

SHERIFF OPATOLA

Virtual Assistant • Web Developer • Administrative Coordinator • Project Manager

Nigeria • Portfolio: [my-portfolio-sable-alpha-wr4yvqh2q0.vercel.app](#) • LinkedIn: [linkedin.com/in/sheriffOpatola](#) • Open to Remote Work

PROFESSIONAL SUMMARY

Detail-oriented and tech-savvy Virtual Assistant, Web Developer, and aspiring Project Coordinator with hands-on experience supporting business operations, e-commerce workflows, and digital project delivery. Proficient across VA, admin, and e-commerce tooling including Asana, Trello, Zapier, Slack, Notion, Shopify, and Google Workspace, alongside a technical background in React, JavaScript, and full stack web development. Combines administrative reliability with a developer's problem-solving mindset — able to manage client operations, build and maintain the websites those operations run on, and support end-to-end e-commerce needs from product listings to order tracking. Fast-learning, self-motivated, and fully equipped for remote, distributed team collaboration.

WORK EXPERIENCE

IT Administrator & Support Staff | WALGAB Career LLC | 2025 – 2026

- Provided day-to-day IT administration and technical support, resolving hardware, software, and system access issues for staff.
- Maintained system reliability and documentation, reducing recurring technical issues through proactive troubleshooting.
- Supported internal workflows and digital tools, bridging technical operations with administrative coordination.
- Assisted with onboarding of new systems and tools, training staff on usage and best practices.

Web Developer (Freelance / Self-Employed) | Self-Employed | 2023 – Present

- Designed and built "Glow Skincare," a full e-commerce web application — including product display, responsive layout, and deployment — giving direct, hands-on experience with the technical side of e-commerce operations.
- Built and deployed additional web applications (e.g. a Weather Forecast App) using React, JavaScript, and modern front-end tooling, hosted on Vercel with GitHub version control.
- Applied software development skills to automate and optimize administrative and back-office workflows for personal and client projects.
- Collaborated on small-team development work, applying version control, documentation, and agile-style task management.

Virtual Assistant (Volunteer) | Tech Startup / Business Organization | 2025 – Present

- Supported e-commerce and business operations including product listing support, catalog organization, order and inventory tracking, and customer inquiry follow-up.
- Conducted in-depth online research and compiled structured reports to support business decision-making and content strategy.
- Managed website backend operations including content updates, basic troubleshooting, and ensuring site functionality remained consistent.
- Coordinated internal communications and task assignments using Slack, Asana, and Trello, improving team workflow efficiency.
- Automated repetitive administrative tasks using Zapier, reducing manual workload and saving the team several hours per week.
- Maintained organized documentation, schedules, and meeting notes via Notion and Google Workspace (Docs, Sheets, Drive, Calendar).
- Facilitated virtual meetings and team check-ins via Zoom, preparing agendas and distributing follow-up action items.
- Supported project tracking by monitoring task progress, flagging bottlenecks, and updating project boards in real time.
- Assisted with email management, drafting professional correspondence and ensuring timely responses to stakeholders and customers.

CORE SKILLS & TOOLS

Virtual Assistant & Admin

- Email & calendar management, scheduling, correspondence drafting, Social media management
- Research, data gathering, and report preparation
- Document management, file organization, and data entry

- Meeting facilitation, agenda preparation, and minute-taking

E-Commerce VA Support

- Product listing, catalog management, and inventory tracking
- Order processing, fulfillment tracking, and returns/customer follow-up
- Storefront platforms: Shopify, WooCommerce (basic-to-working knowledge)
- Customer service support via Zendesk and email/chat channels

Project Coordination

- Task and deadline tracking using Asana, Trello, and Notion
- Workflow automation via Zapier
- Team communication management via Slack and Zoom
- Progress reporting and status updates to stakeholders

Web Development

- JavaScript, TypeScript, React, HTML5, CSS3
- Git & GitHub version control, Vercel deployment
- Website backend management and troubleshooting
- Building responsive, production-ready web applications

Technical Tools

- Google Workspace (Docs, Sheets, Slides, Drive, Gmail, Calendar)
- Microsoft Office Suite
- Canva (graphics and visual content creation)

EDUCATION

OND / HND – Software & Web Development

Federal Polytechnic Offa, Kwara State, Nigeria — Graduated 2025

- Specialized in software engineering principles, web development, and IT project workflows.
- Built and deployed web projects, gaining practical experience in both front-end and back-end development.

KEY STRENGTHS

- Fast Learner — Quickly adapts to new tools, platforms, and workflows with minimal onboarding time.
- Tech-Savvy — Combines administrative know-how with a software developer's problem-solving mindset.
- Versatile — Bridges VA, e-commerce operations, and hands-on web development in one skill set.
- Self-Motivated — Demonstrated initiative by volunteering skills and independently pursuing project work.
- Detail-Oriented — Ensures accuracy in documentation, communications, and project tracking.
- Remote-Ready — Fully equipped and experienced in collaborating with distributed teams across digital platforms.

AVAILABILITY

Open to remote VA roles (including e-commerce VA), web development roles, administrative assistant positions, and project coordinator/manager opportunities. Available for full-time, part-time, or contract engagements.
